

Hi! This is Lujing Xing, a senior student at Peking University, majoring in physics and double majoring in CS. I'm currently looking for a Ph.D. position in Biomedical Engineering, and I'm interested in computational imaging and medical image analysis. I'm interested in multi-modalities, and is open to learning any new modality, and apply deep learning method to enhance its traditional weakness.

Research experiences are presented in [project](#), and my cv is at [here](#)
